

COMPLEX BLOCK LISTS

These checklists show all the blocks printed for the \$1 and \$2 FRNs from Series 1963 through Series 2013. They list "complex blocks"; that is, they separately list Washington vs. Fort Worth printings, and conventional vs. COPE vs. LEPE printings, within each simple block. Web-press notes and paper test notes are also listed as separate blocks.

However, these lists do not attempt to show the serial number ranges for each complex block (except in a few cases where blocks cannot otherwise be distinguished), or even the order in which they were printed within their simple block. For such details, see the group lists available at <http://www.USPaperMoney.Info/serials.pdf>.

In total, these series contain 2,103 blocks of \$1's and 79 blocks of \$2's printed for circulation, plus an additional 201 blocks of \$1's and 105 blocks of \$2's printed for collector sales. All but one of the \$1 premium blocks, and many of the \$2 premium blocks, were issued in the form of full or partial uncut sheets; but some were issued only as single notes, and this is indicated in the listing for each series where it applies.
